State of the state

22 December 1961

SUBJECT: Import and Export of Polish Coal

1. Attached are four tables of statistics dealing with the	
import and export of Polish coal.	
2. coal, which has in the past comprised 50	X1-HUM
a major portion of Poland's export trade (43.7% of exports in dollar	
value in 1956), has steadily declined until in 1960 it accounted for	
only 21.7% of exports in dollar value. Poland has 50	X1-HUM
probably reached a plateau in its coal export and is not able to greatly	
increase its export tonnage. However, the decline in the free market	
price of coal (from an average of 12.30 in 1958 to 8.68 per ton in 1960)	
poses a major problem to Polish efforts to obtain Western credits. Also	
aggrevating this problem is the USSR's continual pressure to divert	
more and more exports to the Bloc area. The USSR would like to see	
60-70% of Polish exported coal going to the Bloc. The Poles thus far	
have been able to persuade the Soviets of the need for foreign credits	
maintaining approximately a $50/50$ balance between trade with the West	
and with the Bloc. Under Stalin this situation was not tolerated and	
Poland was in those days ordered to divert coal to the Sov Bloc. This	
problem can now be negotiated but Poland in the last analysis is always	
subject to economic pressure from the USSR.	
relative stability of the price per	X1-HUM

relative stability of the price per ton inside the Bloc area averaged \$16.12 in 1958, \$16.10 in 1959 and \$16.06 in 1960. A CEMA committee established the Bloc coal price in circa 1956 based on the international coal price as of 1953 or 1954 less 10-15% to incourage intra-Bloc trade. The small variations in price from year to year are due primarily to sorting by size.

4. Despite its large coal production and export, Poland has little
coal suitable for coke and has had to rely heavily on imports to keep
its coking ovens and furnaces in operation. Apparently 50X1-HUM
the CEMA planners in planning construction of coke oven and 50X1-HUM
blast furnace facilities failed initially to consider the fact that coke
requires a special type of coal presently unavailable in Poland.
(457,200 tons of coking coal were imported by Poland during the first
half of 1961). The Poles hoped at first to relieve the coking coal
problem by importing coal 50X1-HUI
A 40-60 mixture, was the limit of profitability.
5. Polish coking coal of good quality has now been located in
the southern part of Poland along the Czech border and approximately
15 mines are under construction in that area. By 1963-64 the first of
these mines should be in production, thus relieving the pressure on
importing. By 1965-66 it will no longer be 50X1-HUM
necessary for Poland to import coking coal. Total production from this
new mining complex is estimated at 1-2 million tons per year.
6. The importation of Browncoal (brickettes), listed in Table II,
is almost entirely derived from shipping Polish Frowncoal across the
border into East Germany where it is pressed into brickettes and then
returned to Poland.
7. The statistics concerning export of Polish coal to the USSR,
listed in Table I, is misleading as only a very 50X1-HUM
small portion of this coal actually goes to the USSR. The USSR directs
this coal to other East Bloc countries and it never enters Soviet terri-
tory. What negligible amounts of coal the USSR does import from Poland
is 60% run-of-the-mine and 40% sorted, primarily for use on railroads and

in electric power production almost exclusively along the Polish/USSR

border which is far removed from the sources of USSR coal.

TABLE II

POLISH IMPORT OF COMBUSTIBLES (in thousands of tons)

50X1-HUM

	<u>1959</u>	<u>1960</u>	1st Half 1961
Brown Coal (Brickettes)	1,313.2	409.1	398.4
Coking Coal *	895•3	775•9	457•2
Raw Petroleum	692•5	713.9	No Figures
Coke	No Imports	112.1	No Imports
Other Liquid Combustibles (Gasoline, Kerosene, Parafin, etc)	1,510.9	1,790.1	50X1-HUM No Figures

^{*} Almost alhocoking coal, types 34-27, presently imported by Poland comes from the USSR. The tonnage amounts to approximately 3/4 million tons annually. Three or four years ago Poland, on a one-time purchase basis, obtained 350,000 tons of coking coal from East Germany.

At the present time Poland is importing no coking coal

50X1-HUM

from East Germany.
